

## PASS Technology: Background checking, made simple

### Introducing PASS

*PASS is a technology solution that provides a single, centralised location from which to coordinate all background checks.*

*This speeds up the process, improves the candidate experience and reduces the cost spent on compliance and outsourcing.*

### What problems does PASS solve?

- **Speeds up the onboarding process.** All the checks are centralised in one location through a combined API. The system is wholly configurable and fully transparent, so compliance processes are built into every step and do not impact the speed at which checks can be conducted.
- **Reduces the cost of background screening.** The level of resource required to conduct checks through PASS is drastically lower and there are no outsourcing costs associated.
- **Provides consistency across departments and geographic locations.** Having a single location where all checks are conducted means there is consistency across teams, business units and regions.
- **Improves the customer experience.** PASS provides a client-branded candidate portal which shows each candidate how far along the process they are and what the next steps are.
- **Removes reliance on paperwork.** PASS digitises background checking, bringing all checks into a central location and removing the need for a manual and potentially slow process.

## How is PASS different?

- **Unique value proposition.** PASS is unique in the marketplace. No one else can provide the same centralised service, experience or level of digitised automation. Competing solutions rely on outsourcing and are not as flexible or configurable.
- **Unique technology (IP) that has taken 10 years to build.** The PASS technology has been developed over 10 years based on extensive client interaction. This pool of intellectual property is unmatched in the industry and means no other solution has the same level of configurability developed to solve customers' day-to-day and strategic challenges.
- **Unparalleled industry experience.** The senior leadership team, in particular CEO Luke Battah, have been leading figures in background checking for over 15 years. Heavily involved with industry bodies and respected thought leaders, PASS has an unparalleled understanding of the industry.

### What our clients say

*"I would have no hesitation in recommending PASS Technology. They have been instrumental to our business and have worked with us on collaborative basis. They are forward thinking, innovative and have their finger on the pulse in really understanding their client needs. We look forward to working with them well into the future. "*

Michelle Gauci, Managing Director, CV Insight
